Gust Store Broken Into Monday Night

Local Police Get The Goods But Misses The Thief

When on his rounds last Monday night constable Chas. noticed some one in Gusts store about 11:30. When he tried the door the marauder ducked behind the counter and went down the trap door to the cellar. Constable Champ went round to the rear of the building just as the thief was coming out the back cellar door, but when he saw Mr. Champ he dropped the lot and went back into the cellar up the trap door and Mrs. E. escape out the front door before Mr. Champ could get back again.

Although he got away the thief has a few clues and are following them up with the hope of finally getting the guilty party.

An investigation showed that the midnight prowler was quite familiar with the layout of the store and new just where to go to get what he wanted. He either wasn't very greedy or else intended to come back for another consignment as he only had about \$2.00 worth of goods neatly packed in an ordinary carton, which he was forced to drop when the constable headed him off.

Federal Government Helps The Farmers

Pass More Legislation Than Any Other Consideration

Canada's Minister of Railways, Dr. R. J. Manion, went to Stittville (Ontario) last week, told citizens of that thriving little farming community what every Canadian farmer knows. Prime Minister Bennett has placed in the statute books more legislation to benefit farmers than any leader of the country since Confederation.

Dr. Manion pointed to the Natural Products Marketing Act, legalizing and financially assisting co-operative selling by voluntarily organized groups of farmers throughout the Dominion; the Farmers Credit Arrangement Act, offering the debt-burdened farmers an opportunity to gain a fresh start and thus remain self-sufficient citizens; the Farm Loan Act, providing credit for deserving farmers at reasonable rates of interest; wheat legislation, stabilizing and giving the farmers on the prairies \$200,000,000 more for their wheat the last four years than they would have otherwise received; and then a Wheat Board and a fixed price lower interest rates, increased markets abroad through the Empire Agreements.

Campbell Makes Over 300 Miles per Hour

British Land Speed Ace 313 Over 5 Miles A Minute

Sir Madein Campbell, British land speed ace, thundered over an official record of 300 miles an hour in his six ton Blenheim on the Salt Flats of Utah Tuesday, an official certificate announcement delivered Wednesday.

New Cabinet For Alberta Announced

Will Investigate Finances as Soon as Possible

Premier - designate for Alberta, has announced his new cabinet as follows:
President of the executive council and minister of education, William Aberhart, Calgary Attorney-general, John W. Huggill, K. C. Calgary.
Provincial secretary E. C. Manning, Calgary.

Minister of Agriculture, trade and industry, William F. Chant, Camrose.

Minister of public works, railway and telephones, W. A. Fallow, Vermilion.

Minister of health, Dr. W. W. Cross, Hanna.

Provincial treasurer and minister of municipal affairs, Chas. C. Huggill, Calgary.

By-elections will be held in two rural constituencies to find a successor for premier-designate Aberhart, who was not a candidate.

At the recent elections, and for Mr. Ross, who also was not a candidate.

Mr. Aberhart stated that a wide investigation into Alberta finances would be commenced as soon as arrangements for the inquiry could be commenced.

Legion Meeting Sunday

The regular monthly meeting of the local Canadian Legion will be held in the club rooms on Sunday afternoon, next, at 3 o'clock. A full attendance is desired.

Mr. S. Britt and her daughter Pauline left last week-end for Vancouver where they will visit friends for a few weeks. Mr. Britt, who has been there for the past two months, will return with them.

Churches

ST. MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a. m.

ST. AMBROSE CHURCH

Rev. H. S. Hammett, Vicar.
12th Sept 1935. Holy Communion 8:00 a. m. Sunday School 10:00 a. m. Sunday School 11:00 a. m. Childrens Service 7:30 p. m. Evensong and Sermon.
The Harvest Festival will be held on Thursday and Sunday Sept. 26th and 29th.

LORDEN MEMORIAL

UNITED CHURCH

Pastor: Rev. R. Erskine Pusey
Sunday - Sept. 26th 1935
9:00 a. m. Church School
10:15 a. m. Morning Worship
Special Flower Service
3 p. m. Service at Howell.
7:00 p. m. Evening Worship
Subject: "The Cure for Anxiety"
"Every man is immortal until his work is done."

RT. HON. R. B. BENNETT

Prime Minister Bennett has promised he would do everything within his power to assist the Social Credit government of Alberta to solve its problems. William Aberhart, premier-designate and leader of the Alberta Social Credit League, has announced.

Mr. Robert Bullen to Start Singing Classes

Will Form Classes on Tuesday September 10th

Mr. Robert Bullen, teacher of singing, announces that he will commence a term for school students at Redcliff school on Tuesday Sept. 10th at 4:30 p.m. The class will be organized on the group-plan. Terms on application of the teachers. Instruction will be given in music reading, voice production, choral singing etc. Here is an opportunity for every boy and girl in Redcliff to obtain a thorough grounding in the art of song at a very nominal fee.

Adult classes on group system will also be organized the same evening at 7:45 in the I. O. O. F. hall when all interested are invited to attend. Full particulars for adult classes may be obtained at this meeting.

Mr. and Mrs. Gus Vogel, who have been in their farm in the local district, have moved to town and will reside here in future.

Italy told the council of the League she could no longer discuss her controversy with the thips.

Rovers Go A'Roving

Here are five Canadian Rover Scouts on board the Canadian Pacific liner Dominion of York, to which they sailed from Montreal to attend the World Scout Jamboree being held this year in Sweden. Eastern and Western Canada are represented by the Scouts, who, left to right, are: L. P. Danks, of Peterborough, Ont., Allan Hume, of St. Paul, Minn., A. B. Patterson, son, scout, of Calgary, Ont., Kingston Webster, of Edmonton, and A. C. Kneeler, of Saint John, N. B.

The Canadian Rovers will form part of a British contingent of 1,500 Scouts attending the Jamboree. Nearly half the entire number will be from the British Isles. The camp for six days at the Jamboree headquarters on Ingomar Island, just far from Stockholm. Elaborate preparations have been made by the Swedish Rovers, hosts of the gathering, who are headed by Prince Gustaf Adolf, eldest son of the Crown Prince of Sweden. The camp will have a first brigade, a second brigade, a third brigade, hospital and will publish a daily newspaper in the four official languages of the World, English, French, German and Swedish.

The Swedish Rover Scout will be the largest of the Rover Scouts. The first was held in Switzerland in 1911. Two of the five Rovers in the above picture, A. C. Kneeler and Allan Hume, attended the 1934 Jamboree.

Tree Planting Train Here Last Thursday

Interesting Pictures Shown and Timely Address

Under the direction of the U. S. Department of Agriculture, a special car was located on the siding here last Thursday evening for the purpose of demonstrating the advantage of trees on the prairies and showing the proper way of planting trees the way to encourage their growth.

The program was opened with a display of moving pictures showing how motor cars were built from the raw material to the finished article. Swedish amusing slides were also shown on the canvas.

The speaker of the evening gave a very interesting talk on the need of trees on the prairies to prevent soil drifting and to conserve moisture conditions. Pictures were also shown impressing on the audience the destruction and devastation caused by bush fires which on many occasions were caused by carelessness on the part of campers and picnickers.

The car was specially fitted up for the comfort and convenience of spectators and a goodly number of old and young was present for the occasion.

It was unfortunate that more farmers from the surrounding district were not present but this was probably due to the lack of advertising.

Little Theatre Meeting On Monday Evening

Will Be Held In The Rotunda Of Redcliff Hotel

A general meeting of the Little Theatre Association will be held in the rotunda of the Redcliff Hotel next Monday evening at 8 o'clock.

All members of the association are urged to present as matters of great importance will be discussed and must be attended to at once.

Much will depend on the outcome of this meeting whether or not the association will be carried on this season. Please don't forget.

Indications are that their will be at least 900 candidates in the field.

Young Redcliff Couple Married Last Monday

Podesta - Paterson

A very pretty wedding took place in St. Ambrose Church, last Monday afternoon, when the vicar, Rev. R. S. Hammett, united in holy wedlock Miss Jane Paterson daughter of Mr. and Mrs. A. Paterson to Mr. Earnest Podesta, son of Mr. and Mrs. A. Podesta, all of Redcliff. The bride was beautifully dressed in white crepe, satin and was assisted by Miss Emma Podesta and Miss Jean Moore who were prettily dressed in mauve and yellow point despire net.

After the wedding ceremony the bride and groom were entertained to lunch at the home of the brides parents and in the evening a wedding dinner was served at the home of the groom's parents. Later in the evening the young couple entertained their many friends to a dance in Cliff Hall where a most enjoyable social hour was spent.

Mr. and Mrs. Podesta will reside in their new quarters on Main Street.

New Cabinet Minister In Bennett Govt.

Three New Appointments Made Last Friday

A minister of marine and two ministers without portfolio were added to Prime Minister R. B. Bennett's temporarily re-organized cabinet Friday.

W. Earl Rowe, farmer livestock breeder, member of parliament for Dufferin-Simcoe until dissolution of the last House, was appointed to the cabinet as minister without portfolio. Mr. Rowe is 42 years old.

Lucien Gendron, K. C., prominent Montreal barrister, is the new Minister of Marine, replacing Hon. Alfred Durand, appointed to the Quebec bench a short time ago. He is 46 years old.

Onesime Gagnon, member for Dorchester, eastern Quebec, until dissolution, becomes minister without portfolio also. He is a prominent Quebec City barrister, and is 48 years old.

The appointment of the marine portfolio leaves only the finance department without a minister. In theory, actual or course, Hon. Edgar N. Rhodes will carry on until after his election October 14th. He will then retire to the Senate, where he was appointed a short time ago.

Joseph W. Baldwin, and his 2-year-old son, Jack, were drowned in the river at Medicine Hat last Friday. They had been in a boat fishing when the boat capsized. The father was a brother of Chas. Baldwin who at one time lived in Redcliff.

Seeking Plants That Will Resist Drought

Seed Hunters Search Cold Desert For New Type of Vegetation

U.S. government botanists are searching the Asiatic deserts for plants to protect American farm-lands against drought.

More than 1,800 lots of seed from drought-resistant plants already have been brought back from Turkistan by plant hunters of the department of agriculture. Those plants now are growing in plant reserve stations established last year.

Additional lots of seed have arrived recently from Manchuria and Mongolia, and other valuable shipments are expected after the expedition, now working on the edge of the Gobi Desert, has harvested the seeds which will ripen this fall.

Prof. Nicholas Roerich, head of the expedition, reports: "In the completely dead sands of Asia, it was enlightening to unearth the roots of age-old forests."

"Strangely enough," Prof. Roerich wrote, "precisely on these sites one may find excellent dwelling sites and bits of woven grasses, indicating that life once flourished here."

"In the dead deserts of Asia one may often hear the murmur of underground streams, which are believed to be the basis of subterranean life. Not seldom, these streams have been driven underground and pebbles by human hands which have rapidly destroyed the vegetation."

Despite human exploitation extending over centuries, and despite adverse natural conditions, it was pointed out, some vegetation remained in the Asiatic sands. It is that "tenacious" vegetation which the American expedition is seeking.

"Upon these dead sands, upon these endless mounds," Prof. Roerich said, "one still finds remnants of great forests; there still are found great quantities of feathergrass, and other steppe grasses at once strongly resistant and useful under such conditions."

In past years, introduction of soy beans, various lupines, Chinese elm, and created wheat grass, it is hoped that Asia once more will provide plants which, after necessary adaptation, may resist drought to the great plains and help control erosion.

The expedition was sent to areas bordering the Gobi Desert because of the great pasture regions which apparently withstand terrible heat of summer and cold of winter and also scanty rainfall.

Did Not Need Degree

Practical Training In Rural Newspaper Offices Helped Man Succeed

When it was proposed that Mr. Williams be made the editor of the newly organized department of journalism at the University of Missouri, the academic world was aghast. Why? Williams had not even a bachelor's degree, they protested. They were right, he admitted. More than that, he had never attended college. His formal instruction ended with graduation from a small town high school, but his education had not stopped there. Continued in printing office and at an editor's desk, it had made Williams a man of well rounded culture.

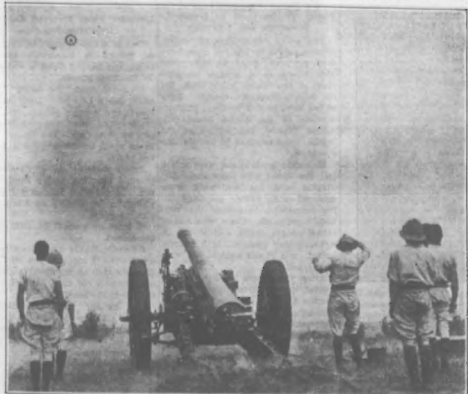

Since his job was to turn out practical newspaper men, the objections served their double and wise purpose. As a result, various articles had fallen out, and her coat had become entangled in the rudder. She managed to control the machine until the coast was torn away by the wind.

That was a quarter of a century ago. To-day Walter Williams, dean of the journalism department at Columbia, Mo., one of the most successful in the nation. Williams knew the "how" as well as the "why" of the stuff he was teaching.

Trained in the practical school, Williams recognized its limitations. He wisely urged the fullest possible academic education for newspaper workers. This small town editor who entered academic halls with the smell of printer's ink on him made a lasting contribution to the cause of a better-informed and more highly educated American press.

The average elephant can haul 15 tons, lift half a ton, and carry three tons on its back.

UNUSUAL PHOTO TAKEN AT THE PETAWAWA MILITARY CAMP

This remarkable picture was taken when a 60-pound field gun was fired by the Third Medium Battery, Royal Canadian Artillery (Kingston) at Petawawa Camp, Pembroke, Ont. The shell fired by this gun travels at 1,700 feet per second, and the photographer, taking the picture the instant the gun was fired, got a picture of the shell. Our artist has drawn a circle around the shell, as it speeds away in the distance.—Photo Artista Studio, Pembroke.

Libraries in China

Every University And Secondary School Now Has One

Construction was begun a few months ago upon the largest university library in China, to supply the needs of the 1,500 students of Nanking Central University. The present library of the university, designed only ten years ago, has already proved inadequate and the new building will provide seating accommodation for 1,000 readers. The library at Tsing Hua University at Peking, which seats 600, previously had the largest accommodation. The growth of libraries in China is very recent. Less than twenty-five years ago there was no university or public library anywhere in the country, but to-day every university and every secondary school has a library and the demand is increasing every year. That at Nanking University now in course of construction will be open to students of other universities in the city and also to the general public.

A Valuable Tool

Vanity Mirror Aided Airman in Getting Out Of Difficulty

A vanity mirror proved a valuable addition to the tool-kit of Fraulein Elin Reinhold, a German airwoman, who was in difficulties during a flight from Berlin to Capetown. She experienced bad weather, and after several bumps, she was started by a sudden jolt, and found that she had lost control of the rudder. The machine was behaving in an extraordinary manner, Fraulein Reinhold said, and she was unable to discover the cause, because she could not see the lower parts of the machine behind her. Through a vanity mirror she was able to look back and learn that the terrific bumping apparently had loosened the catch of the lid of the luggage compartment. As a result, various articles had fallen out, and her coat had become entangled in the rudder. She managed to control the machine until the coast was torn away by the wind.

Guess Was Right

A stern, black-faced woman entered the office and inquired for the head of the firm. The junior clerk informed the great man that a lady with "a nice good-looking" asked for him.

"Is she good-looking?" asked the man.

"Yes, sir, very beautiful," was the reply.

"Show her up."

After the lady's departure, the head remarked to the junior, "A nice judge of beauty you are."

"Well," replied the youth, "I thought she might be your wife, sir."

"So she is!" dryly replied his employer.

In the 64 years of the Third Republic, France has had 36 governments. She has had 26 since the war and 10 in the last three years. This is democracy, but it is hardly efficient.

An area of 117 square miles, with a population of 1,500,000 and a reliable value of approximately \$300,000,000, is administered by the London county council.

Cannot Be Explained

Impossible To Put Into Words Many Things We Know

Augustine said once: "If you do not ask me what is time, I know. If you ask me, I do not know." There are many things which we are not able to put into a concise definition. What is God? What is spirit? What is personality? What is love and what is hate? We know all these things, and yet we cannot well define them. We attempt it at times and usually grow somewhat muddled and discouraged when we discover that the reality which we know eludes us when we try to put it into words; yet the reality is none the less because we cannot describe just what it is. Even in what we call science this is seen. The thing we call matter would seem at first sight to be most easily defined and yet, as we proceed, it eludes us so remarkably that we are compelled at last to admit that we simply cannot tell just what it is, the only thing which seems to be clear is that it is probably some kind of force. We must be content to know many things which we are not able to explain. And this applies to the wisest who ever lived, or who ever will live.

International House

People From Many Countries Register At Scottish Hostel

That the new Youth Hostel in Edinburgh, Scotland, has become an "international house" has been disclosed by the recent survey of the visitors' register. Of the 1,500 people who have stopped there since it opened last spring only 400 were Scots. About 56 per cent. were from England, and 16 per cent. were from the remainder 18 per cent. Of these the remainder 18 per cent. were from the United States, Northern Ireland, Denmark and the Irish Free State came next. In order of numbers. Others were registered from Canada and all parts of the world.

English postmen must be at least 5 feet 4 inches tall.

Loons can swim faster under water than on the surface.

FANCIFUL FABLES

Painful Prairie Flowers

Work Of Women Artist To Be Shown In England

Winifred Walker, internationally known painter of wild flowers, while on a tour through Saskatchewan put on canvas the colorful blooms which grow on the prairie. Later in the year the paintings will be exhibited in England.

She has been awarded medals at exhibitions held in London, Paris, Philadelphia and Ghent, and her pictures have been hung in Paris salons and the Royal Academy in London. Miss Walker is the official artist for the Royal Horticultural Society in England.

"I painted 120 different kinds of Canadian wild flowers from Montreal to Vancouver when I was here in 1925," the visiting artist said. "Canadian flowers have a remarkable beauty and grow very well in England. Lady Byng has a Canadian garden in which she grows dozens of different kinds of Canadian flowers and shrubs. I have been asked to paint it."

A New Resolution

California Hyond Asia People To Meet As Christians

Something new in the way of religious work has come from the California Synod of the Presbyterian Church. The ministers and laymen ask everyone on the highways to observe "the cause of earthquakes." There is too short for easy negotiation of the pass, and they would observe generally the laws of courtesy and safety on the highways.

It's an intriguing phrase, Christian motoring. Try it, if you are on the highways on Sunday—or any other day.—Winifred Asia Star.

Still Working On Case

Police Believe Judge Who Vanished Five Years Ago Is Alive

Manhattan's most baffling mystery is now five years old—still as strange and bizarre as it was in 1930 the Supreme Court Justice Joseph Force Crater disappeared.

The eminent New York jurist vanished without a trace—left his \$25,000 a year position, straightened his files, dined with friends and disappeared.

Justice Crater is still alive, according to the dogged belief of Police Detective Joseph von Waisensau, who has been working on the case since the story was marked missing. Perhaps, like many other men, he wearies of the world he knew and embarks on a new life elsewhere. Mrs. Crater, to whom he left all his estate, had also a little memorandum, which concluded, simply: "Am having a discovery. Love Joe." Mrs. Crater, like every one else, has no answer to the mystery.

Indicates Better Times

Great Increase Shown In Building Permits Over Last Year

Ottawa reports that the value of building permits issued in 11 Canadian cities during June showed an increase of \$2,705,000 over the building mark of June, 1934. This is not a high figure, but it is at least 60 per cent. increase.

Indications that improvement has been general. Better conditions have prevailed all year to date, as the building records for each month have been up in comparison with the corresponding months of 1934. The cumulative total for the first six months 1935 was \$24,639,071, as against \$16,411,377 in the first half of 1934. The difference is convincing.

The Ottawa dispatch implies that operations have been distinctly more favorable than in the last few years. It is encouraging that such a situation should exist.—Daily Commercial News.

Christmas Parade Mailed

The Red Cross of Buckleview, Okla. has set an example in mailing Christmas parcels early. Fifty-one bags of presents were sent to San Francisco for forwarding to soldiers in foreign service. The gifts were prepared by church organizations.

Umpires don't like high cameras and have complained about them privately and otherwise.

In some parts of Scotland, the finding of a four-leaf clover denotes bad, instead of good luck.

Cannot Be Predicted

Impossible To Tell Time Of Earthquake Shock Experts Report

Widespread publicity to the claims of Reuben Gressman of New York of ability to predict earthquakes shook the world's forecasters who study for earthquake study into action.

The Carnegie Institution seismological laboratory at Pasadena, California, through Dr. Henry Oldenburger, member of the staff, said all attempts to predict earthquakes have been without success. Furthermore, he said, the Gressman methods are not at all new.

"Earthquake predictions have been published by the press and in magazines, especially *Topical*, which statement sets forth."

"In some instances Turkey, Persia, Western India, or the northern part of Africa were mentioned as a region of the origin. In others more exactly, a strong shock in western India was predicted for this date. The destructive shock corresponding to the prediction has occurred."

"According to the report these predictions were made on changes in the gravitational pull due to the varying positions of the sun, the moon and the planets. The moon produces tides in the solid crust of the earth with an up and down slight change in frequency which frequently exceeds one foot. . . .

"If the gravitational pull of these bodies is really acting as a major cause of earthquakes, there should be a clear parallelism between earthquake frequencies and the changes in the gravitational pull."

"Statistically, however, show in many regions such a parallel definitely does not exist, while in others there is a slight change in frequency of earthquakes corresponding to these changes in gravity, but by far too small to have earthquakes predicted on this fact."

May Have Difficulty

Inventor Preparing For Shaking Japan Across English Channel

Vietas of shaking over the English Channel to France have been opened up to English folk as a result of the activities of a German inventor who has been practicing "shaking" off the coast of Dover, England.

Friedrich Walther has been seen by many, testing his water shaker in the English Channel. They consist of two cone-shaped sheets made of metal, six feet long, eight inches deep, and 10 inches wide. He propels himself along with the aid of two hand-screws attached to which are metal cylinders.

Justice Walther has taken two years working on the idea, and claims to be able to "walk better on water than on the land." He has made a record of five miles an hour in normal conditions.

At present Herr Walther is walking up and down the Channel, "practicing." He intends, when he is in proper training, to walk across the Channel in five hours. Others who have discovered the difficulty of un-twisting silk after a slip in the snow are wondering what happens if a man has a grip on a fast descent down a wave.

Decorations Are Omne

Italians Ornamented Coach Of Lord Mayor Of London

Is there any vehicle still in use more lavishly and variously decorated than the coach of the Lord Mayor of London? When built a century and a half ago its ornamentation was entrusted to an Italian painter. He continued to introduce Roman trophies, figures of the four quarters of the globe, the heraldic shield of the Duke of Devonshire, Neptune, Truth with his mirror, Temperance, the City Arms, the Second and Third, the States of Justice, the Tower, and St. Paul's Cathedral. Unfortunately, as more than one Lord Mayor has complained, the comfort of the great old coach is by no means commensurate with its magnificence.

An Unthinkable Ship

Invention of a ship that will not sink or rock in roughest seas was claimed by Henry H. Black, fifty-six year-old Portland newspaper vendor, Black's design embodies a series of pontoons instead of the conventional hull. His model was on view recently at the Bremerton (Wash.) shipyard in 1917. He has patented models of the pontoon ship and says only money is needed to place their first order on the seven seas.

A pound of butter was the customary payment given for a day's manual labor in Paris, in 1644.

Western Canada's Juvenile Coffee

NABOB COFFEE

offers DOUBLE VALUE!

Because it is scientifically blended, smooth, fragrant and satisfying. Because it is sealed in a vacuum container, guaranteeing lasting freshness... and because it is of such high quality as in the tin. Also packed in 3 lb. conventional tins. Write much more and Dominion Cakes will return.

"There are excellent substitutes for Nabob Coffee, but none so good as Nabob." Send for the NEW NABOB FRAGRANT It's Free!

REPLY, INQUIRY & C.O.D. TO: VANHOUGH-EDWARDS, WINNIPEG

Paradise For Snakes

Six Species May Be Seen In One English District

If one wants to see snakes, he is advised to go to the clay-mining district north of Dorset, in Dorsetshire. If there is a snake's paradise in Britain, this is the place. There are six species of British reptiles, and representatives of all of them, including the rare smooth snake and adder, may be seen here. The four species are the adder, the grass snake, the slow worm, and the common lizard. The adder is the only one of these reptiles that is poisonous and its bite is rarely fatal, though, naturally, medical attention should be obtained as quickly as possible if one is bitten. But it is not often that anyone is bitten, and this snake has been described as "dangerous only to toy dogs, stupid babies, and travellers."

Collections Show Increase

Figures For Federal Income Taxes Higher This Year

Canadians are dipping into their pockets to pay more and more federal income taxes. It was shown in figures released by the department of national revenue. In the 1930-31 tax season, \$54,647,704 was collected in the first four months of the year. An increase of \$1,774,742 over 1930.

Two districts, Quebec and Regina showed decrease this year. Quebec a decrease of \$120,743 and Regina, \$1,301.

Place Was Transformed

Overseas Visitors Unaware They Were Received In Historic Room

Many of the guests at the Government garden party to overseas visitors at No. 10 Downing Street were quite unaware that when they were received by Mrs. Baldwin and Mrs. MacDonald it was in the Cabinet Room, states a London publication. It was the oldest and the most beautiful room in the British Empire, if not in the world, had been cleared of its usual furniture and in particular of the big table at which so many of the cabinet decisions have been taken. So unlike a meeting room it looked that one well-known overseas guest, as he left it, asked if it would be possible for him to have a look at the Cabinet Room. "But you have just come out of it," he was told. "Then let me go back there and have a good look at it," he replied, and back he went.

**Interesting
Local Items**

Thanksgiving Day in Canada
has been set for Thursday, Oct.
8th.

Labor day passed off quietly
last Monday. There was no
demonstration in town.

School opened last Tuesday
for the fall and winter season
with a good attendance.

The swimming pool has now
closed for the season after a
successful summer amusement
for the youngsters.

Mrs. G. H. Worts and son
Cyril, returned home last
Sunday after a Motor trip to
Ontario points.

Mrs. J. R. McKenzie and Mrs.
W. J. Campana, who have been
in a motor trip through Ontario
for the past month, returned
home Tuesday.

Mrs. Thomson left Tuesday
for Edmonton to attend the
funeral of her sister-in-law, Mrs.
D. Muir who died suddenly last
Monday.

Messrs. H. Meldrum and Geo.
Thomson of the Glass Plant
office staff, accompanied by
Miss McWain and Miss Ansley
motored to Banff and Lake
Louise last week-end.

Mr. and Mrs. P. Lavelle ac-
companied by Mrs. Panten,
went a pleasant holiday motoring
through the mountains and
visiting friends at different
points. They returned home
Tuesday.
